Education

K. J. Somaiya College of Engineering, Mumbai 2023 – 2027
B.Tech in Computer Engineering CGPA: 7
Senior Secondary (XII, CBSE): 71.2% | Secondary (X, CBSE): 70.2%

Technical Skills

- **Languages:** C++, JavaScript, Python
- **Web Development:** React.js, Next.js, Node.js, HTML5, CSS3
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Cloud:** AWS S3
- **Data & Analytics:** SQL, Microsoft Excel, Power BI
- **Tools:** Git, GitHub

Experience

Business Operations & Data Analytics Intern, Suvria Enterprises Jun 2026 – Aug 2026
FMCG D2C Startup, Full-time
itemize

Tracked customer repeat-purchase rate and sales trends over rolling periods using Excel and SQL, surfacing patterns to support inventory and marketing decisions
Built Power BI dashboards to visualize stock levels and sales performance, giving management real-time visibility into inventory movement
Managed end-to-end product listings on Blinkit, including inventory updates and promotional ad campaigns to drive visibility
Generated product listing images using AI tools (Gemini), streamlining content creation for online listings
Independently owned data tracking, stock monitoring, and listing operations as the sole intern at an early-stage startup, adapting across data, e-commerce operations, and marketing tasks

Projects

LessMissed – Browser-Based Usability Analytics System GitHub
Chrome Extension, TypeScript, React, Next.js, MongoDB, AWS S3 College Project,

- Built a Manifest V3 Chrome extension (TypeScript, React) capturing five behavioral signals – gaze, click, scroll, cursor, and page visibility – using WebGazer.js for webcam-based eye tracking
- Designed the MongoDB schema and built the Next.js backend with AWS S3 integration to store time-series event data and full-page screenshots
- Implemented server-side fixation derivation using dispersion-threshold (I-DT) clustering to group raw gaze coordinates into fixations
- Built the analytics dashboard to visualize gaze heatmaps, click heatmaps, and element-level attention rankings
- Identified and resolved a self-occlusion issue where the tracker’s own overlay interfered with element detection, meaningfully improving attribution accuracy

Ayurveda Wellness App Live Demo
React, TypeScript, Vite, Tailwind CSS, Node.js, MongoDB

- Built the Dosha assessment quiz feature, an interactive flow determining a user’s Ayurvedic body constitution and generating personalized recommendations
- Integrated the Razorpay payment gateway for secure order processing and multiple payment methods across the product store
- Implemented role-based access control (RBAC) to separate permissions and views across user, doctor, and admin roles
- Built the review and rating system enabling verified users to leave product feedback

Positions of Responsibility

Member, Team ETA (Autonomous Vehicle Team), KJSCE 2024 – 2025
Contributed to the software team, including pathfinding logic in C++

Operations Team Member, AR/VR Club (Team Vision), KJSCE 2023 – 2024
Organized 4–5 technical events and club activities
